

## The new C-Class gives you a new feel for the road.

### Agility and effortless superiority

The road has always felt more special in a Mercedes. And with the new C-Class, it feels better than ever. From interior to engines, this is a car designed to respond rapidly and precisely – both to its surroundings and to your needs. There's a wide range of engines with increased outputs all round and the Agility Control Package with selective damping system further enhances the car's responsiveness. Another technological highlight is the new Advanced Agility Package with sport mode\*, which gives drivers more dynamic handling at the push of a button.

Inside, the new C-Class offers appreciably more passenger space and, thanks to the high-quality materials and new cabin design, a more refined ambience. It also lets you decide just how sporty or luxurious its cabin should be, and even what kind of face it should have, making it easier than ever to create the ideal C-Class for you.

Representing a significant leap forward from its predecessor, the new C-Class Saloon offers a superior ride quality, sportier handling and enhancements to both power and torque, whilst maintaining low emissions and good fuel economy.

In addition to the new features fitted as standard, the new C-Class Saloon also offers a host of optional equipment never previously available across this range.
